Volunteering is an opportunity to connect with your industry!

Through volunteering, you can create a positive impact and help shape the future for your industry. Volunteers are the lifeblood of any association and at the grass roots level, who work in the various cities,
bringing value to the membership through education, networking and local lobbying initiatives.

What's in it for you? It is extra work, and there is little recognition for that work, but here are worthwhile reasons to get involved:

- Make Business Connections in the Industry. Be viewed as a leader in the industry because of your contribution/involvement with the association at the highest levels.
- Be a Part of Something Bigger! Believe that you can make a difference
- You get to influence and shape your industry's future.

The Ontario Sign Association is accepting volunteers for the following committees:

Membership & Benefits: The Membership committee will cover target areas of retention, recruitment and communication.

Regulatory/Governance: Responsible for all sign related issues, technical questions including permits, by-law reviews across Ontario, and engage, educate and partner with planners, decision makers and government official.

Education/Workshop: Responsible of the development of the educational activities, workshops and seminars.

Fundraising and Networking: Oversees development and implementation of the Networking, Events and Fundraising Plan; identifies and solicits funds from external sources for support

Finance Committee: Oversees development of the budget; ensure accurate tracking/monitoring/accountability for funds; ensure adequate financial controls; reviews and audits.

If you are interested and would like to learn how you can make a difference, be part of something bigger and/or just want to know if volunteering is for you?
